Dr. Geetha Srinivas received her DVM degree from the College of Veterinary Medicine, Bangalore, India. Dr. Srinivas pursued her graduate degree at the Virginia-Maryland Regional College of Veterinary Medicine, University of Maryland. Her research work for her MS degree was on the development and characterization of strain specific monoclonal antibodies to Newcastle disease virus. Dr. Srinivas earned her PhD degree in 1995 in Veterinary Microbiology and Immunology. Her dissertation work was on the development of receptors specific monoclonal antibodies and molecular characterization of enteric receptors in pigs. After a brief post-doctoral research fellowship from South Dakota State University, Brookings, SD, Dr. Srinivas joined a biologics firm, Fort Dodge Animal Health, Fort Dodge, IA, in 1996, as the Virology Section Manager in the Product Development Department. She joined the Center for Veterinary Biologics (CVB) in 2003 as a reviewer with responsibilities to review data packages for licensure of veterinary biologics. She took the Supervisory VMO position in 2007 and heads the Virology Section in CVB since 2013.
