Tel: +39-0332-785550

Dr. Halder studied veterinary medicine at the University of Munich (Germany) and obtained a VMD from the University of Munich in 1987 for research on crustaceans and fish diseases. She worked for several years as a research scientist at the University of Munich and the Akademie für Tierschutz, Neubiberg, Germany.

Dr. Halder joined the European Commission in October 1995 and currently holds a position as a senior scientist at the European Commission's Joint Research Centre, Directorate F – Health, Consumers and Reference Materials, Chemical Safety and Alternative Methods Unit / European Union Reference Laboratory for Alternatives to Animal Testing (EURL ECVAM) (F.3). She is responsible for EURL ECVAM's activities related to replacement, reduction and refinement (3Rs) approaches to animal tests in the quality control of biologicals and environmental hazard assessments of chemicals.
