Cat has a research background with a degree in Virology from the University of Edinburgh and PhD in Veterinary Immunology conducted at the Pirbright Institute. She spent 4 years doing post doctoral research at the Pirbright Institute on DNA vaccines for FMD and the immune response to ASFV. Cat then moved into regulatory affairs for Veterinary medicines, working first as an immunologicals assessor for the UK Veterinary Medicines Directorate then moving to industry with Pfizer then Zoetis. She has over 10 years industry experience focused on the full life cycle development of Veterinary Vaccines and Biopharmaceuticals, having licensed over 15 new vaccines and the first Veterinary monoclonal antibody in the EU. Cat is actively involved in Animal Health Europe working groups and in the 3Rs area Cat is the Veterinary lead for the IMI2 VAC2VAC project as well as representing Zoetis within EPAA and other internal and external 3Rs projects.
